

Farm Name: _____

Feed Handling

Area: _____

Date: _____

Power available for feeding:

Electrical power: (1-phase, 3-phase) Voltage (208v, 240v, 480v)

Tractor used: Model _____ Year _____ Horsepower _____ gasoline diesel

Tractor used: Model _____ Year _____ Horsepower _____ gasoline diesel

Feed Storage:

Bunker silos Describe unloading method _____

Horsepower _____ Hours use per day _____ gasoline diesel

Tower silos List those normally used at any one time for feeding

Corn silage Unloader horsepower _____ Hours per day _____ Days/year _____

Haylage Unloader horsepower _____ Hours per day _____ Days/year _____

H.M. Corn Unloader horsepower _____ Hours per day _____ Days/year _____

Other Unloader horsepower _____ Hours per day _____ Days/year _____

Concentrate bin Unloader horsepower _____ Hours per day _____ Days/year _____

Feed mixing bin

tractor powered Horsepower _____ Hours per day _____ Days/year _____

electric motor Horsepower _____ Hours per day _____ Days/year _____

Feed Delivery: (Describe how feed is delivered to various groups of livestock)

Conveyers used on a daily basis Horsepower _____ Hours per day _____

Horsepower _____ Hours per day _____

Horsepower _____ Hours per day _____

Horsepower _____ Hours per day _____

Horsepower _____ Hours per day _____

Feed wagon Tractor: gasoline diesel Hours use per day _____

Mechanical bunker feeder: Horsepower _____ Hours use per day _____

(1-phase, 3-phase)

Voltage (208v, 240v, 480v)

Describe feeding method for livestock groups:

Milking cows:

Dry cows:

Bred heifers:

Young stock:

Bull calves:
